

GPS501

Software Update Guide

You may update the GPS501's firmware or Camera Point, City Data and POI Data.

You can also back up or edit HOME, WORK, HOTEL, AIRPORT, Marked Point and Track Data on your PC. Connect the GPS501 to a PC with the supplied USB cable.

The Minimum PC requirements;

- Pentium II equivalent or higher
- Operating System: Win98second edition, Win2000 or XP. This model also supports "Windows ME".
- USB Port
- Internet Capable

You will need;

GPS501 Unit

USB cable

Please ensure the batteries are well charged before beginning update.

STEP 1: HOW TO DOWNLOAD THE APPLICATION SOFTWARE

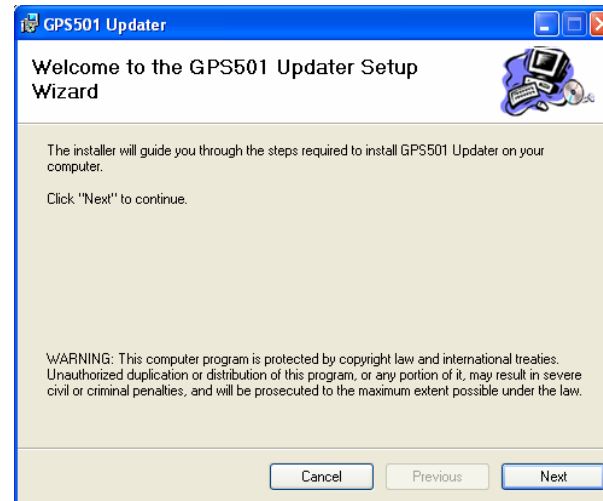

- 1 Visit the Customer Support/Downloads page on the Uniden website below and download the "GPS501 Updater Software" and "USB Driver" zipped files. Unzip the downloaded files.

For Australian model: www.uniden.com.au
For New Zealand model: www.uniden.co.nz

STEP 2: HOW TO SETUP THE APPLICATION SOFTWARE

- 1 Run the **GPS501UpdaterInstaller.msi** file in the updater folder to install the GPS501 Updater Software. The GPS Updater Software icon will appear on the desktop.

Do Not click to start the updater software until the USB Driver is installed at instruction 3 below.

- 2 Turn on the GPS501 by pressing & holding the **[cancel/power]** button. Connect the USB cable to the GPS501 and then to the PC.
- 3 When "**New USB Hardware Found**" appears follow the instructions to point to the USB driver data downloaded from the website.

STEP 3: HOW TO USE THE APPLICATION SOFTWARE

- 1 Click on the GPS501 Updater Software icon on the desktop. The prompt "Do you connect to the Web Server?" appears.

Click **Yes** and the updater will retrieve information from the web server and the GPS501 and then display it in the Web Access window. If the selected data (Camera, City, POI or Firmware) on the web server is from a newer version then you can update the GPS501 by clicking on Execute.

(If you click **No** then the updater will open the Web Access window with no data information.)

- 2 You may click on the other window options on the left side panel to view and edit data you have saved on the GPS501.

Always close the GPS501 Updater application software before disconnecting the GPS501 from the PC.
